

TESTABLE HYPOTHESES OF AVH

20th June

(see also a word doc with colored tests and outcomes)

After some further secondary research and notes to talk to Dr Bennet about, I have tried to put together some testable hypotheses. Also to test latest hypothesis published online. Following are some that occurred naturally throughout the day.

20th June 2018 1544

G:I'll bet you \$5000 that they do (referring to SLED cancelling my licence)

s:I'll agree to that bet. I will pay you \$5000 if they cancel my licence

Unfortunately forgot to write down a date to qualify this bet on, so it can't be adjudicated

200618 1413 from phone

G:scott there's something shelley is not telling you (referring to having heard about the library confession, and wanting me to discuss it with her.

S:I bet there isn't. You are being gifted. No-one from the library knows Ability Options

OUTCOME: ???

1419

?:You just lost (referring to the state library situation I assume)

OUTCOME: **WRONG**

1429: Craig has just reported you to SLED

OUTCOME: **WRONG**

1430: Scott there will be an email for you when you get home from Craig

(And when I got home at approx 1511, there was indeed. He was letting me know I can resume work with a doctors note)

OUTCOME: **HALF CORRECT**

1450:

JD: Scott, craig just wrote another letter to...

OUTCOME: **WRONG**

1514

crying: they are setting you up to fail.

OUTCOME: **WRONG**

1640

JD: you know they both thought you were fucked so that (state library) is not going to work out

?M: that could be true. I don't know

s:You're both identifying possibilities for stress and pain, and you are being shit people by exploiting things unknowable to me a human. However, you do not take into account the human capacity for not being pee brained criticising turds all the time like yourselves. They will give me some latitude. Furthermore, there are other factors that you fail to take into account that are none of your business.

OUTCOME: ???
